PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER:	0116 (Tng)	SESSION NUMBER:	1
DATE OF SESSION:	23 MAR 90	DATE OF REPORT:	23 MAR 90
START:	0901	END:	0926
METHODOLOGY:	CRV	VIEWER IDENTIFIER:	052

1. (S/SK) MISSION: To describe the target site (Verrazano Narrows Bridge) in Stage 3 terminology.
2. (S/SK) VIEWER TASKING: Encrypted coordinates only.
3. (S/SK) COMMENTS: No Physical Inclemencies. 052 had excellent site contact from the first ideogram throughout the entire session. There was very little "doorknobbing". There were indications throughout the session that 052 was switching back and forth between accessing the feedback folder and the actual site (rather than just the feedback folder, itself, as is common to beginning viewers). This probably indicates that we should watch for an upcoming "transition period" to increased viewing ability.
4. (S/SK) EVALUATION: 3
5. (S/SK) SEARCH EVALUATION: N/A

MONITOR: 018

HANDLE VIA SKEET CHANNELS ONLY

Photography by
Graeme Outerbridge

As a boy, photographer Graeme Outerbridge romped on bridges in his native Bermuda; as an adult, he learned to appreciate them "as things of beauty." For his new book, *Bridges* (H. N. Abrams, 1989), he photographed 44 of these technical wonders, capturing their unique personalities. At New York City's Verrazano Narrows Bridge (above), he sought "its sweeping strength, its
